

Simplifying repairs
processes using
TransLution™ Software

Overcome the challenges of monitoring and tracking jobs and parts

In a repair shop, tracking jobs and parts and monitoring the repair progress can be a challenging task. TransLution™ allows you to seamlessly track the entire repair process, as well as job cards and work hours on the tasks.

The system is integrated into your current processes and SYSPRO and the outcome is a complete overview of every aspect of your jobs for easier and faster processing.

Benefits:

- Simplified tracking of repairs and parts
- Tracking of job cards and work hours
- Integration into SYSPRO
- Improved visibility of the job progress
- Generation of customer quotes

Follow our handy visual guide to see how each step simplifies your repairs processing.

Accept Quote

If the customer accepts the quote the items allocated for the repair can now be issued to the repair job and work can proceed.

Reject Quote

RETURN TO CUSTOMER

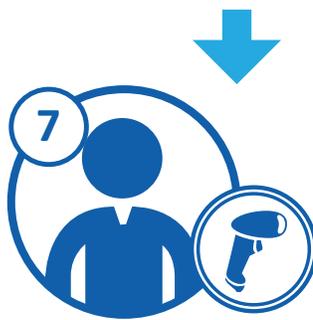

If the customer chooses not to have the item repaired then it is returned to the delivery counter for customer collection. The repair job can also be canceled.

View System Jobs

There are various ways to view the job repair data, for example this function showing which items have been issued to which jobs. The other screen shows a list of all the jobs in the system. Note that completed jobs are orange and jobs still in progress are green. The details shown on these grids or any others can be configured based on the system requirements.

Scan Completed Job / Post SYSPRO Job Receipt

This function completes the job ensuring that no more items can be issued to it. This also acts as an alert to the front desk that the job is complete so that the customer can be contacted to collect the repaired item.

TRANSLUTION™ PRODUCTS

TransLution™ EazyScan

EazyScan uses hand-held scanners to provide instant availability of process information which results in maximum control, increased information accuracy, traceability, reporting and improved decision making.

TransLution™ EazyTouch

EazyTouch runs on a standard PC or touchscreen where screens are configured to include only those operations relevant to each process, including buttons to print labels, view picking orders, stock count data, or reveal production instructions.

TRANSLUTION™ IN USE

Quality Management

Promotes compliance during the sampling process and ensures accurate recording of product quality and environmental factors during the production process. Quality Manager supports legislative requirements enabling traceability and product recalls.

Warehouse Management

A wide range of inventory management functions are supported from PO receiving, WIP transactions, GIT transactions, standard Inventory Transactions and Sales Order processing. Posting directly to SYSPRO allows for accurate stock control and warehouse management.

Repairs Management

In a repair shop, tracking jobs and parts and monitoring the repair progress can be a challenging task. TransLution™ allows you to seamlessly track the entire repair process, including materials used and time spent on the repair.

Manufacturing

Accurate accounting of manufacturing costs requires detailed and timeous capture of both labour and materials data. Scanning and capturing data during a job or while moving a product allows for tighter controls in order to reduce waste, improve stock accuracy and increase productivity.
