

Warehouse Management System

Start your journey to Operational Efficiency

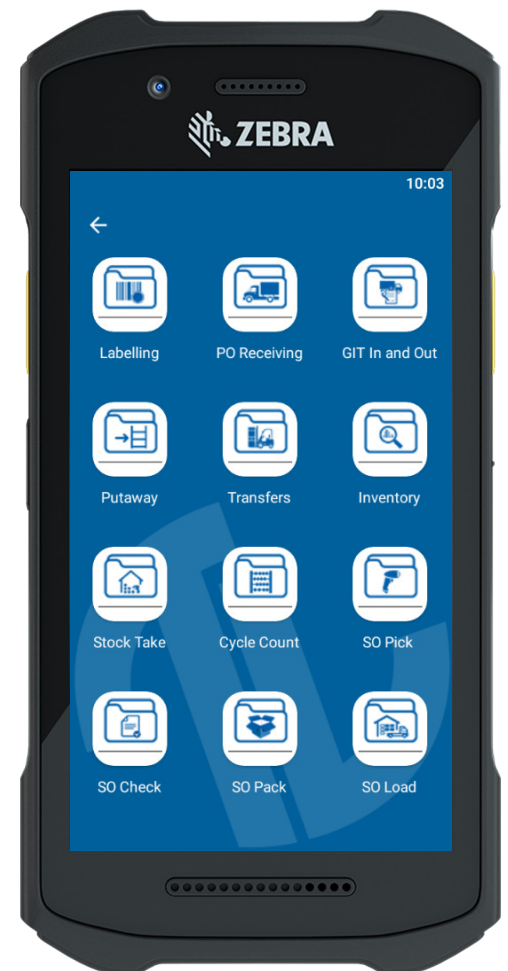

Manage your warehouse operations accurately and effortlessly.

www.translutionsoftware.com

At TransLution, we understand that many warehouses are unique, which is why we've designed our software to be fully configurable. Our software allows you to create tailored solutions that precisely address your specific warehouse management needs, whether it's streamlining receiving processes, optimizing stock management, or efficiently dispatching stock.

In addition to tailored solutions, TransLution also offers standard ready-to-use functionality. This functionality is designed to expedite your implementation process and keep your costs in check. It's a quick, cost-effective solution that can help you get up and running with minimal time and resources. It comes pre-configured with standard functions, labels, documents, and reports.

RECEIVING

MANAGEMENT

PACK & SHIP

“

“Previously we bought a product that was rigid and un-configurable, and we were fast outgrowing its limited functionality. We started our journey with TransLution using its standard functionality, and as our needs have grown, TransLution has effortlessly adapted and grown alongside us. By leveraging TransLution’s significant capabilities we have expanded its use into areas of our business that were not initially on our radar.”

”

Receiving

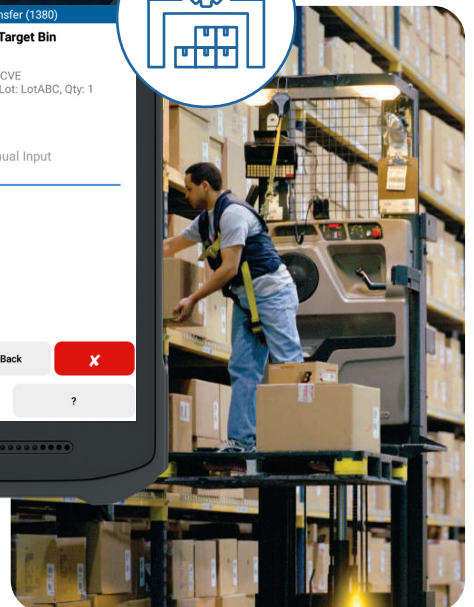

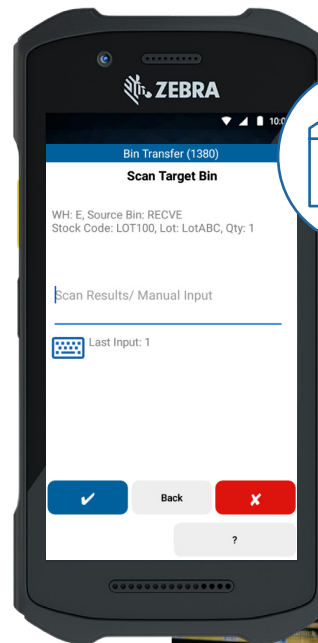

The key features of TransLution’s Receiving Module are:

- **Labelling:** Print bin location and stock labels
- **Purchase Order Receiving:** Capture stock as it is received and seamlessly post to SYSPRO to create the GRN.
- **Goods in Transit:** Create and receive GITs, keeping SYSPRO up to date at every step of the way.

Stock Management

The key features of TransLution’s Stock Management Module are:

- **Movements:** Effortlessly perform put aways, bin transfers, warehouse transfers and goods in transit.
- **Adjustments:** Process up adjustments, down adjustments, inventory receipts and expense issues.
- **Stock Take:** Perform stock take on a handheld device and update SYSPRO’s stock take file as you count.
- **Cycle Count:** Simply count stock in bins and update SYSPRO with any variances found.
- **Sales Order Picking:** Print pick slips, pick sales orders and manage dispatch notes.

Pack and Ship

The key features of TransLution's Pack and Ship Module are:

- **Packing:** Pack, measure and weigh handling units. Keep track of your handling units and their contents with tracking labels and packing slips.
- **Checking:** Check each picked item against the dispatch note to ensure all items are dispatched to your customer.
- **Loading:** Ensure stock is loaded on the correct truck to the correct customer by managing your loads with TransLution.

"TransLution has transformed our business. Our ROI for the cost of TransLution is less than one year."

"With TransLution we eliminated overtime."
