

Tailored to how you work, not the other way around.

Use EazyTouch to Save Money & Enhance the User Experience

TransLution™ EazyTouch screens are configured to include only those operations relevant to each process, including buttons to print labels, view picking orders, stock count data or reveal production instructions.

Do you need to:

- Capture data on an industrial touch-screen PC to support production workflow?
- Interface with weighing devices or a barcode scanner during production?
- Use “ruggedised” tablet PCs in the warehouse, loading dock or factory floor?
- Provide your operators with big buttons on screens that are easy to use?
- Print labels during production?
- Integrate production data and other stock movements with SYSPRO software?

A touch-screen device with TransLution™ EazyTouch may be the answer to these problems.

Enhanced SYSPRO Integration

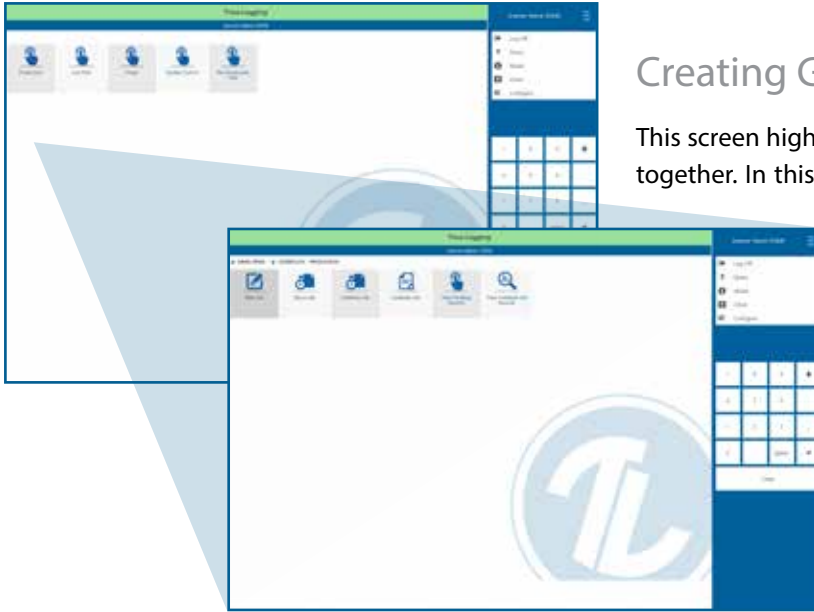

With EazyTouch you can select a number of SYSPRO software integration transactions from our extensive list of supported functions. You can configure EazyTouch to post specialised information captured on the scanner into SYSPRO:

- Lot Numbers
- Serial Numbers
- General Ledger Codes
- Additional References and Notations
- Any additional data fields supported by SYSPRO

AVAILABLE ON

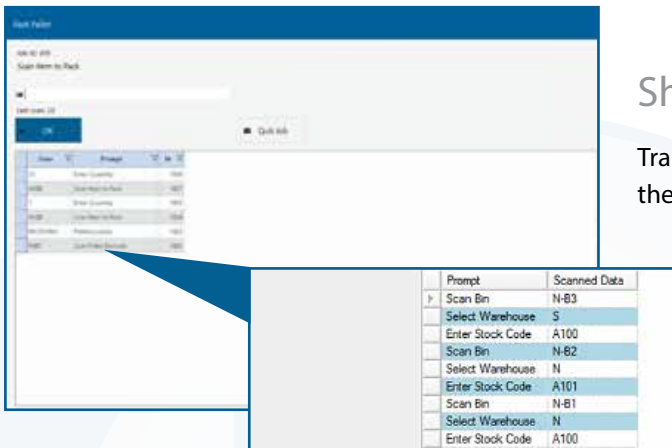

Creating Grouped User Functions

This screen highlights how functions in TransLution™ can be grouped together. In this example the WMS button allows the user to view all the Warehouse Management Systems features and functionality.

The second screen shows the features that are grouped under the WMS function. Once selected, the user can access all warehouse management functions.

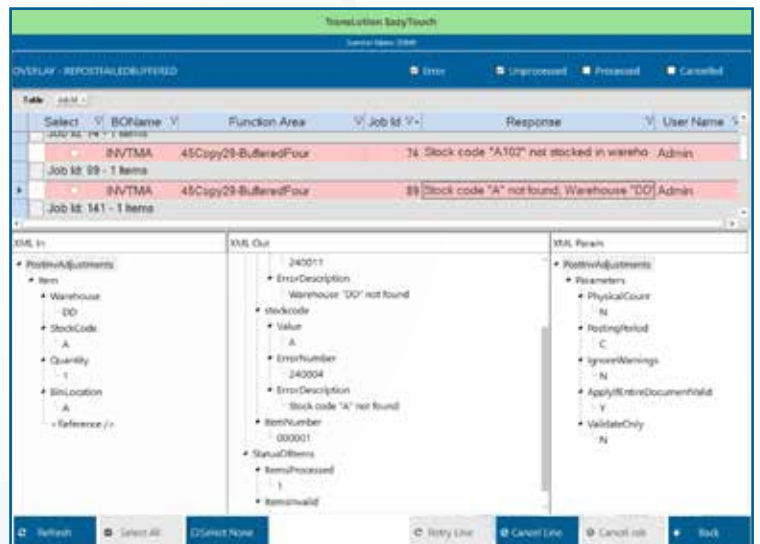

Show a Grid of History

TransLution™ displays a history of previous scans, so the user can view the steps in the scanning process.

Integrating to Syspro

TransLution™ posts the data it captures from the shop floor to Syspro in real-time. This screen shows users any errors that occurred during integration. Users can then select to repost lines or cancel lines.

TRANSLUTION™ PRODUCTS

TransLution™ EazyScan

EazyScan uses hand-held scanners to provide instant availability of process information which results in maximum control, increased information accuracy, traceability, reporting and improved decision making.

TransLution™ EazyTouch

EazyTouch runs on a standard PC or touchscreen where screens are configured to include only those operations relevant to each process, including buttons to print labels, view picking orders, stock count data, or reveal production instructions.

TRANSLUTION™ IN USE

Quality Management

Promotes compliance during the sampling process and ensures accurate recording of product quality and environmental factors during the production process. Quality Manager supports legislative requirements enabling traceability and product recalls.

Warehouse Management

A wide range of inventory management functions are supported from PO receiving, WIP transactions, GIT transactions, standard Inventory Transactions and Sales Order processing. Posting directly to SYSPRO allows for accurate stock control and warehouse management.

Repairs Management

In a repair shop, tracking jobs and parts and monitoring the repair progress can be a challenging task. TransLution™ allows you to seamlessly track the entire repair process, including materials used and time spent on the repair.

Manufacturing

Accurate accounting of manufacturing costs requires detailed and timeous capture of both labour and materials data. Scanning and capturing data during a job or while moving a product allows for tighter controls in order to reduce waste, improve stock accuracy and increase productivity.

TRANSLUTION™ CLIENTS

TransLution™ services over 350 companies, and supports over 3 600 mobile devices across multiple industry sectors:
